Boost Your Productivity with the Financial App

## The Essential Collection of Financial Audit Tests & Reports

FIN

When conducting an audit, knowing which areas to test and developing the right tests is an essential part of your work. The Financial App saves hours of effort when creating standard test routines. It can be used on every audit engagement to improve the quality and consistency of your work.

Pre-Build Analytic Tests

Eliminate the guesswork about which areas to test with this collection of 55+ analytic test and reports for business-critical areas:

General Ledger ● Accounts Payable
Accounts Payable ● Fixed Assets ● Inventory

Convenient ribbon interface allows access to tests and options.

Easily select and run any test from the Marketplace. Simply tag and go!

> "The Financial App has saved us lots of time and is very easy to use. You simply select the tests you want to run and follow the steps to get your results. It increases productivity from day one."

> Kronos Incorporated

## Make data-driven decisions powered by analytics.

Extend Your Reach

The App helps perform standard evaluations and run specific audit tests to detect issues. It can be used on every audit engagement to boost productivity and improve audit quality and consistency.

- Works seamlessly with CaseWare IDEA® to deliver results in seconds

- Easy to use – minimal training required to get started

- Provides a standard set of automatic audit tests in every year-end audit

- Integrates into the audit cycle to replace conventional procedures

- Ensures audits are uniform and increases the quality of all year-end audits

- Tests are itemized in a process-oriented logical structure by audit phases

- Creates independency of different accounting systems and their system-based evaluations

- Simplifies journal entry testing required by the International Standards on Auditing (ISA 240.32 and ISA 240.A43)

Easy to Use, Easy to Implement

1. Import client data
2. Launch the Financial App (FIN) and select desired routines
3. Correlate data field names in routines and files using "Define Tags" button
4. Press OK and review results in "Conclusions" fly-out window
